300Mbps 11n Wireless Gigabit Router & Access Point

This 300Mbps (802.11n) wireless Gigabit router and access point is perfect for a demanding user who shares an existing cable-, DSL or fiber modem with several computers and enables you to create a (wireless) network up to 64 computers. The integrated 4 port Gigabit switch and the QoS (Quality of Service) option enable you to copy large amounts of data, play games and watch streaming media at the same time. With the WPS button it is very easy to install and configure this Gigabit router after opening the box. This device is downwards compatible with 54 and 150Mbps wireless networks. The router/AP provides high security functions like a firewall, WEP encryption (64/128/256 bit) and WPA/WPA2 (WiFi Protected Access). The router is already WPA2 configured which ensures optimal security.

Highlights
